The Language of Reality Dr. Thomas Stark,
The answer to existence is that existence is an eternal language a language that solves itself optimizes itself perfects itself and finally speaks to itself and tells itself exactly what it is It is a language that becomes conscious of itself It might seem as though humans became conscious through language but in fact language became conscious through humans In *The Selfish Gene* Richard Dawkins wrote We are survival machines robot vehicles blindly programmed to preserve the selfish molecules known as genes This is a truth which still fills me with astonishment In fact we are living language nodes of a living cosmic language that is using us to become conscious of itself Because we are language beings we create languages and through languages we eventually arrive at the original language the Ur Language the language in which we ourselves are written and expressed This is the numerical language of mathematics the language of energy of syntax and semantics the language of mind

The Mapping of Markesh Paul Tonks,2005
The Ajya Na Ku are coming and should this rock fall the dragons will also turn and this time the mighty Rydren Empire won t be there to stop

them Glider's words as he guards the cathedral-like rock of Kumbran enclosing the dormant Cour Vu Du are full of dread for Juran and his expedition to map the terrain of Markesh. Does their trek into the unknown follow a straightforward plan or could it be part of some deeper strategy? Something about one of the team, Idron, the half-breed isn't quite right. Then when Matrosse falls, Kumbran is threatened by the forces of evil. In the final showdown, alliances between humans, Elves, Dwarves, and dragons are stretched to the limit. Can they keep the demonic Black Owls at bay and battle the sleeping terror in the Rock? Find out in Paul Tonks' magically woven saga of treachery, shapeshift, and darkness, courage, cunning, and light in *The Mapping of Markesh*.

Darwinism and the Divine Alister E. McGrath, 2011-02-28. *Darwinism and the Divine* examines the implications of evolutionary thought for natural theology from the time of publication of Darwin's *On the Origin of Species* to current debates on creationism and intelligent design. Questions whether Darwin's theory of natural selection really shook our fundamental beliefs or whether they served to transform and illuminate our views on the origins and meaning of life. Identifies the forms of natural theology that emerged in 19th century England and how they were affected by Darwinism. The most detailed study yet of the intellectual background to William Paley's famous and influential approach to natural theology set out in 1802. Brings together material from a variety of disciplines including the history of ideas, historical and systematic theology, evolutionary biology, anthropology, sociology, and the cognitive science of religion. Considers how Christian belief has adapted to Darwinism and asks whether there is a place for design both in the world of science and the world of theology. A thought-provoking exploration of 21st century views on evolutionary thought and natural theology, written by the world-renowned theologian and bestselling author.

[Rational Mysticism](#) John Horgan, 2004-03-22. The author of *The End of Science* chronicles the most advanced research into such experiences as prayer, fasting, and trances in this great read. *The Washington Post*: How do trances, visions, prayer, satori, and other mystical experiences work? What induces and defines them? Is there a scientific explanation for religious mysteries and transcendent meditation? John Horgan investigates a wide range of fields: chemistry, neuroscience, psychology, anthropology, theology, and more to narrow the gap between reason and mystical phenomena. As both a seeker and an award-winning journalist, Horgan consulted a wide range of experts including theologian Huston Smith, spiritual heir to Joseph Campbell; Andrew Newberg, the scientist whose quest for the God module was the focus of a *Newsweek* cover story; Ken Wilber, prominent transpersonal psychologist; Alexander Shulgin, legendary psychedelic drug chemist; and Susan Blackmore, Oxford-educated psychologist, parapsychology debunker, and Zen practitioner. Horgan explores the striking similarities between mystical technologies like sensory deprivation, prayer, fasting, trance, dancing, meditation, and drug trips. He participates in experiments that seek the neurological underpinnings of mystical experiences. And finally, he recounts his own search for enlightenment, adventurous, poignant, and sometimes

surprisingly comic Horgan's conclusions resonate with the controversial climax of *The End of Science* because as he argues the most enlightened mystics and the most enlightened scientists end up in the same place confronting the imponderable depth of the universe
