Nine Films About Technology:

Films from the Future Andrew Maynard, 2018-11-15 Deftly shows how a seemingly frivolous film genre can guide us in shaping tomorrow's world. Seth Shostak, senior astronomer at SETI Institute, artificial intelligence, gene manipulation, cloning, and interplanetary travel are all ideas that seemed like fairy tales but a few years ago. And now their possibilities are very much here. But are we ready to handle these advances? This book by a physicist and expert on responsible technology development reveals how science fiction movies can help us think about and prepare for the social consequences of technologies we don't yet have but that are coming faster than we imagine. **Films from the Future** looks at twelve movies that take us on a journey through the worlds of biological and genetic manipulation, human enhancement, cyber technologies, and nanotechnology. Readers will gain a broader understanding of the complex relationship between science and society. The movies mix old and new and the familiar and unfamiliar to provide a unique, entertaining, and ultimately transformative take on the power of emerging technologies and the responsibilities they come with.

Fright Night on Channel 9 James Arena, 2011-12-22 From 1973 to 1987, *Fright Night* was a fixture of the late Saturday evening schedule on independent New York television station WOR-TV. A genre fan's nightmare come true, the modestly produced showcase featured horror films both classic and obscure, from Universal's *Frankenstein* series to such lesser-known delights as *Beast of Blood* and *The Living Coffin*. *Fright Night* suffered no delusions of grandeur and never claimed to be anything more than what it was: great entertainment on a Saturday night. This thorough, affectionate tribute to *Fright Night*'s glory days includes a complete listing of all films shown on the series as well as discussion of WOR-TV's other horror movie programs from the 1970s and 1980s. Also featured are interviews with the major surviving players, including *Fright Night* creator Lawrence P. Casey.

The Big Nine Amy Webb, 2019-03-05 A call to arms about the broken nature of artificial intelligence and the powerful corporations that are turning the human-machine relationship on its head. We like to think that we are in control of the future of artificial intelligence. The reality, though, is that we, the everyday people whose data powers AI, aren't actually in control of anything. When, for example, we speak with Alexa, we contribute that data to a system we can't see and have no input into, one largely free from regulation or oversight. The big nine corporations—Amazon, Google, Facebook, Tencent, Baidu, Alibaba, Microsoft, IBM, and Apple—are the new gods of AI and are short-changing our futures to reap immediate financial gain. In this book, Amy Webb reveals the pervasive, invisible ways in which the foundations of AI—the people working on the system, their motivations, the technology itself—are broken. Within our lifetimes, AI will, by design, begin to behave unpredictably, thinking and acting in ways which defy human logic. The big nine corporations may be inadvertently building and enabling vast arrays of intelligent systems that don't share our motivations, desires, or hopes for the future of humanity. Much more than a passionate, human-centered call to arms, this book delivers a strategy for changing course and provides a path for liberating us from algorithmic decision makers and powerful corporations.

Foundation (U.S.), National Science Foundation (U.S.), 1964 **Make Room! Make Room!** Harry Harrison, 2010-07-01 A detective hunts down a killer in a dystopian overpopulated NYC in this classic science fiction novel that inspired the film *Soylent Green*. Originally published in 1966, *Make Room Make Room* imagines a world at the end of the twentieth century where Earth is so overwhelmed by rampant population growth that it teeters on the edge of self destruction. In New York City alone, thirty five million people are squeezed into its packed boroughs, scrambling like rats for the world's dwindling resources. The only food available is a product called soylent. And while the government tries to maintain order, the rich get richer and the poor stay underfoot. Finding a killer in this broken world is one hell of a job. But that's exactly what Det. Andy Rusch has been assigned to do. If he can stay alive long enough, he might just solve the biggest case he's ever been on, unless humanity finally fulfills its promise and destroys itself first.
