[An Address on Technical Education and Industrial Drawing \(Classic Reprint\)](#) Walter Smith, 2017-12-02 Excerpt from An Address on Technical Education and Industrial Drawing It is a common thing to hear sensible men say as it is also frequently said in newspapers that for the duties of real life the children in the public schools are not so well prepared now as they were twenty years ago or even fifty years ago though they know more and it costs more to teach them whilst a silver tongued orator in Massachusetts has stated that under the old district school system when a boy spent a few weeks in the school in winter and worked the rest of the year on the farm he got a better because a more practical education than he can get in the country to day The trouble about such remarks as these is that they are true and that it is possible for them to be true reflects great glory on the advancement of this country in civilization and much discredit upon public educators and public education thus lagging behind the progress and failing to supply the educational needs of the country About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at

When Old Technologies Were New Carolyn Marvin, 1990-05-24 In the history of electronic communication, the last quarter of the nineteenth century holds a special place for it was during this period that the telephone, phonograph, electric light, wireless, and cinema were all invented. In *When Old Technologies Were New*, Carolyn Marvin explores how two of these new inventions, the telephone and the electric light, were publicly envisioned at the end of the nineteenth century as seen in specialized engineering journals and popular media. Marvin pays particular attention to the telephone, describing how it disrupted established social relations, unsettling customary ways of dividing the private person and family from the more public setting of the community. On the lighter side, she describes how people spoke louder when calling long distance and how they worried about catching contagious diseases over the phone. A particularly powerful chapter deals with telephonic precursors of radio broadcasting: the Telephone Herald in New York and the Telefon Hirmondo of Hungary and the conflict between the technological development of broadcasting and the attempt to impose a homogenous, ethnocentric variant of Anglo-Saxon culture on the public. While focusing on the way professionals in the electronics field tried to control the new media, Marvin also illuminates the broader social impact, presenting a wide-ranging, informative, and entertaining account of the early years of electronic media.

But not if you are Dominic Wilcox. Dominic sees things a little differently. For him, inside each of these everyday things are hundreds of surprising ideas waiting to be discovered: The Portable Bottom Seat, the Sick Bag Beard, Wrist Nets for the Butterfingers. **Graphics** Rembrandt Peale, 2018-12-14 Excerpt from *Graphics A Manual of Drawing and Writing for the Use of Schools and Families* When the principles of drawing are clearly understood and have become familiar by practice and before any attempt be made at Writing the student should draw with point or pencil the correct forms of writing only as extended lessons in drawing After the eye and judgment are satisfied by repeated corrections and variations what forms of letters are desirable then and not sooner should the hand be trained to execute them with uency and facility with pen and ink It is advisable that the student of drawing if old enough should learn to rule his own books according to the lessons which are to be studied and the repetitions which may be required The measurement of lines and their mechanical execution forming an essential part of the system which is to be learnt the teacher should see that they are properly done before any use of them be attempted If a pair of compasses are not at hand a strip of paper may serve to mark by dots the proportions of lines to be ruled About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Machine Drawing and Design for Beginners Henry J. Spooner,2016-09-17 Excerpt from Machine Drawing and Design for Beginners An Introductory Work for the Use of Technical Students It is not usual for writers to refer to such minor details as machine and lever handles so that young draughtsmen are often left to their own resources to guide them in such matters therefore a chapter xiii dealing with them has been included In recent years much attention has been given to roller and ball bearings particularly in motor car work so the construction of these and the principles which govern their design are explained in Chapter XVIII In Chapter XIX The recent and important improvements in spur gearing are described and although the greatly improved helical gears have made mortise wheels practically obsolete the consideration that we shall for some years to come still be using some of the old plants led the Author to include mortise wheels in this chapter In Chapter XXVI Will be found over one hundred questions relating to the subject suitable for examinations or for home work purposes About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**Selected Drawings From Old Masters in the University Galleries and in the Library at Christ Church, Oxford, Vol. 2 (Classic Reprint)** Sidney Colvin,2018-10-08 Excerpt from Selected Drawings From Old Masters in the University Galleries and in the Library at Christ Church Oxford Vol 2 Bitter experience of his own might well be supposed from the word Intollerabile written along the upper margin of the sheet to have prompted Leonardo thus to illustrate the old motto Virtutis comes Invidia But it is on the whole more likely that the sketch belongs to the same cycle as the preceding two and was done to order as an illustration of the view which Ludovico il Moro took of those whom he chose to regard as his enviers and detractors The frost of intellectual pedantry blights the invention and but for the text which explains the designs we might imagine that Envy wounded by the palms and laurels of Virtue was the victim and not the assailant The actual drawing nevertheless is touched with the unfailing fire and magic of Leonardo s hand and the stealthy amble of Death on four feet is as grim a piece of macabre imagination as can be found About the Publisher Forgotten

Sidney Colvin, 2018-10-08 Excerpt from Selected Drawings From Old Masters in the University Galleries and in the Library at Christ Church Oxford Vol 3 This study hitherto unpublished and until two years ago quite unknown belongs to a small group or Florentine drawings to which the distinguished name of Verrocchio can with reasonable confidence be attached To the student it is therefore an example of great importance in spite of its unfortunate condition It has at an early date been much worn and rubbed no doubt by studio use The outlines of the features and of the folds of hair and drapery have been pricked or pounced for transfer indicating that the drawing was actually used as the cartoon for a picture a process which has somewhat disguised their original delicacy In some places moreover as in the left eyelid and nostril and the lips and chin these outlines have been corrected and reinforced with the pen apparently before the pouncing and perhaps by the original draughtsman himself Later and this is the worst the flesh parts especially the cheek throat and shoulder have been minutely and mechanically stippled over by the brush of some restorer ignorant of form and drawing in a warm grey tone imperfectly harmonizing with that of the chalk The parts which remain uninjured are nearly the whole of the hair veil and dress so far as it is shown with some few portions of the more delicate modellings of the forehead nose cheek and temple About the
